

HARISH T S J

Frontend Engineer

Phone: +91-7092565730 — harishtsj@gmail.com — [LinkedIn](#) — [GitHub](#)

Location: Chennai, Tamil Nadu

Summary

Front-End Developer with 2+ years of experience building responsive web applications using React.js, JavaScript, HTML5, and CSS3. Experienced in Redux Toolkit, REST API integration, and UI performance optimization. Former Performance Test Engineer with expertise in Apache JMeter and system performance analysis

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux-toolkit

Developer Tools: Git, GitHub, GitLab, Docker

Testing: Apache JMeter, Load & Endurance Testing

Backend: Node.js, Express.js, Socket.io

Database: MongoDB

Experience

Frontend Engineer

Aug 2023 – Present

Tata Consultancy Services

Chennai, Tamil Nadu

- Architected reusable and scalable UI components in React.js to streamline development and maintain consistent design patterns across the application.
- Optimized frontend rendering performance by identifying and debugging UI bottlenecks using Chrome DevTools.
- Integrated RESTful APIs using Axios and Fetch to enable dynamic data handling and seamless client-server communication.
- Developed responsive Single Page Application (SPA) interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3.
- Implemented centralized state management using Redux Toolkit for scalable application architecture.
- Participated in feature development cycles, collaborating with designers and backend developers to translate product requirements into functional UI components.

Performance Test Engineer

Aug 2021 – Jul 2023

Tata Consultancy Services

Bhubaneswar, Odisha

- Designed and executed performance test scenarios using Apache JMeter to simulate high concurrent user traffic and evaluate system scalability.
- Conducted load and endurance testing to assess application stability, reliability, and performance under sustained workloads.
- Implemented parameterization and correlation in JMeter test plans to enable realistic user simulations and efficient test execution.
- Analyzed JVM memory usage and garbage collection behavior using GC Viewer and Eclipse MAT to identify memory-related performance issues.
- Monitored application and infrastructure performance metrics using Grafana dashboards to track system health during test executions.
- Collaborated with development teams to identify performance bottlenecks and support performance tuning and optimization efforts.

Education

Bachelor of Engineering. Electronics & Communication Engineering

2016 – 2021

Anna University

Chennai, Tamil Nadu

- **CGPA:** 6.8/10

Projects

WhatsUp – Real-Time Chat Application

2026

- Built a real-time chat app with authentication and live messaging using Socket.IO
- Managed global state with Redux Toolkit and designed responsive UI using Tailwind CSS
- Implemented event-driven UI interactions and dynamic state updates using React state.
- Developed backend APIs with Node.js, Express, MongoDB and containerized using Docker
- **Live:** [Whatsup](#)

TaskPilot – Full Stack Todo App

2026

- Built a full-stack Todo app with authentication, CRUD, and pagination
- Tech Stack: React, Node.js, Express, MongoDB, Docker
- **Live:** [Todo](#)

Mechatron UI – React SPA

2023

- Developed a responsive React UI with reusable components
- **Live:** [Mechatrons](#)
